Separate Amplifier Proximity Sensor with Adjustment Potentiometer

# E2C/E2C-H

### Separate Amplifier Sensor with Sensitivity Adjustment

- · Compact design with smaller Sensor Head.
- $\bullet$  Heat-resistance model available for application between -10 and 200°C.

### **Ordering Information**

#### Sensors [Refer to *Dimensions* on page 18.] Standard Models

Note: Characteristics will change if the cable length changes. Do not cut or extend the cable.

#### Accessories (Order Separately)

Mounting Brackets A Mounting Bracket is not provided with the Sensor. Order a Mounting Bracket separately if required. [Refer to Dimension on page 21.]

| Name              | Model     | Applicable Sensors     | Remarks |
|-------------------|-----------|------------------------|---------|
| Mounting Brackets | Y92E-F3R5 | E2C-CR8A, for 3.5 dia. |         |
| Mounting Brackets | Y92E-F5R4 | E2C-C1A, for 5.4 dia.  |         |

**Connection Sockets** A Socket is not provided with the Amplifier Unit. Order a Socket separately if required. [Refer to Dimension on page 21.]

| Name                     | Model   | Applicable Amplifier Unit | Remarks  |
|--------------------------|---------|---------------------------|--|
| Front Connection Sockets | PYF08A  | E2C-GE4A<br>E2C-GF4A      | Hold-down Clips (Order Separately)<br>PYC-A1<br>Sold as a set. |
|                          | P2CF-08 | E2C-AM4A                  |  |
|                          | P2CF-11 | E2C-AK4A                  |  |
|                          | P3G-08  | E2C-AM4A                  |  |
| Back Connection Sockets  | P3GA-11 | E2C-AK4A                  |  |

\*1. The minimum value when using the solid-state control output on the Amplifier Unit. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.
 \*2. Refer to 6 for cable lengths when combining Amplifier Units and Sensors. The characteristic impedance of the high-frequency coaxial cable is 50 Ω.

| E2C-JC4EH       |  |          |          |  |  |  |  |

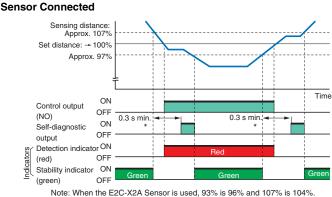

Note: The standard cable length is 3 m. Models with 5-m are manufactured upon order.

#### **Self-diagnostic Function**

The self-diagnostic output transistor will turn ON in the following cases. (The output will turn ON for any of these conditions individually.) (1) Sensor open circuit: Transistor will turn ON the instance there is an open circuit for the Sensor (including the cable).

#### Sensor Open Circuit

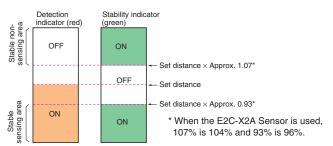

Note: When the E2C-X2A Sensor is used, 93% is 96% and 107% is 104%.
 The self-diagnostic output may turn ON if the sensing objects moves a low speed. In actual application, include an ON-delay timer circuit or other suitable measure.

- (2) Detection: The output will turn ON if a sensing object is within 93% to 100% of the sensing distance continuously for 0.3 s or longer (e.g., for sensing object position offset).
- (3) No detection: The output will turn ON if a sensing object is within 100% to 107% of the sensing distance continuously for 0.3 s or longer (e.g., when background is influencing detection).

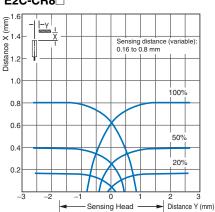

#### Indicators

- The detection indicator lights when a sensing object approaches the sensing distance to indicate that a sensing object has been detected.
- The stability indicator lights when the sensing object approaches within 93% of the sensing distance or moves away from 107% of the sensing distance to indicate a stable sensing or non-sensing condition.

#### **Connections between Amplifier Unit and Sensor**

#### **Load Connections**

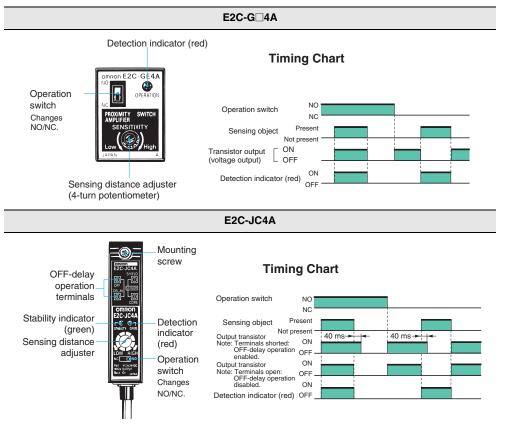

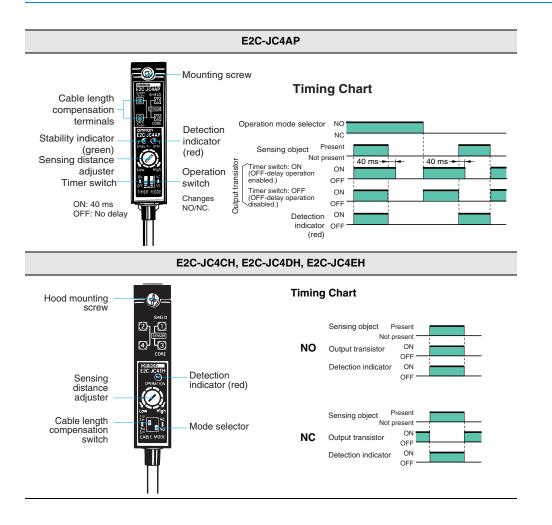

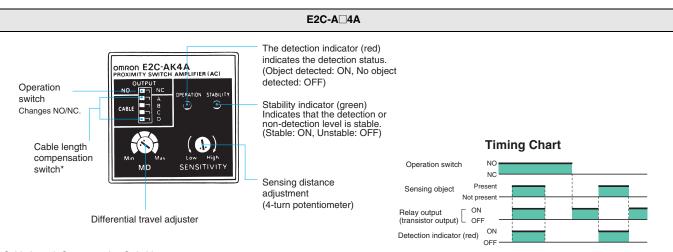

The E2C-AK4A supports relay and transistor/photocoupler outputs, and the E2C-AM4A supports both NPN and PNP open-collector output. They can be connected to a wide variety of load types and power polarities.

### Nomenclature and Timing Charts

#### **Amplifier Units**

\* Cable Length Compensation Switching

Set this switch to the proper setting depending on whether the standard cable length is being used or the cable has been cut shorter.

#### **Amplifier Unit Switch Settings**

| E2C-CR8A<br>E2C-CR8B<br>E2C-X1A<br>E2C-C1A<br>E2C-X1R5A |                 | A B C D          | A<br>B<br>C<br>D | A<br>B<br>C<br>D | A<br>B<br>C<br>D | A<br>B<br>C<br>D |                  |                  |                  |                  |                  |
| E2C-X2A<br>E2C-X5A<br>E2C-X10A<br>E2C-C20MA             |                 | A<br>B<br>C<br>D |

Note: 1. Mutual Interference Prevention: When mounting Sensors with the same diameter and cable length in parallel, set the DIP switch to modes that differ by 1 m in cable length. Specifications, however, may not be sufficiently met, so always check operation before actual application. This method cannot be used for the E2C-C20MA.

2. When using the E2C-CR5B + E2C-AM4A (or AK4A), set all the pins on the Amplifier Unit DIP switch to the left.

#### **Safety Precautions**

#### Refer to Warranty and Limitations of Liability.

#### <u> WARNING</u>

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

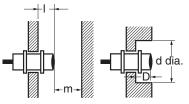

#### Precautions for Correct Use

Do not use the Encoder under ambient conditions that exceed the ratings.

#### Design

#### Influence of Surrounding Metal

When mounting the Sensor within a metal panel, ensure that the clearances given in the following table are maintained. Failure to maintain these distances may cause deterioration in the performance of the Sensor.

#### Influence of Surrounding Metal

| tal | (Unit: mm) |  |

|   | E2C-X5A(H | l)       |    | (18)  |    | 15  |
| <b>F2C-C20MA</b> 25 120 40 60   | E2C-X10A  |          |    | (30)  |    | 30  |
|   | E2C-C20M  | Α        | 25 | 120   | 40 | 60  |

Note: Values in parentheses for diameter d are the outer diameters of Shielded Models.

#### **Mutual Interference**

When installing Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained. Mutual interference can be prevented by using the cable length compensation switch, but doing so will also change coil characteristics. Specifications such as temperature specifications and sensing distance, may not be sufficiently met, so always check operation before actual application.

This method cannot be used for the E2C-G 4A, E2C-JC4A, E2C-C20MA.

#### Mutual Interference (Unit: mm)

| Model      | Distance | Α   | В   |
|------------|----------|-----|-----|
| E2C-CR8    |          |     |     |
| E2C-X1A    |          | 20  | 15  |
| E2C-C1A    |          | 20  | 15  |
| E2C-X1R5A( | H)       |     |     |
| E2C-X2A(H) |          | 30  | 20  |
| E2C-X5A(H) |          | 50  | 35  |
| E2C-X10A   |          | 100 | 70  |
| E2C-C20MA  |          | 300 | 200 |

Note: The above values are for a differential travel setting of 5%.

#### Mounting

• Do not use excessive force when tightening the nuts on the E2C-X and E2C-C20MA. A washer must be used with the nut.

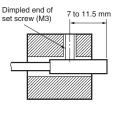

| Model        | Torque   |
|--------------|----------|
| E2C-X1A      | 0.98 N·m |
| E2C-X1R5A(H) | 2.0 N⋅m  |
| E2C-X2A(H)   | 5.9 N⋅m  |
| E2C-X5A(H)   | 15 N⋅m   |
| E2C-X10A     | 39 N⋅m   |
| E2C-C20MA    | 15 N⋅m   |

Note: The above leeways in tighten torque assume that a toothed washer is being used.

#### Mounting Unthreaded Cylindrical Models

When using a set screw, tighten it to a torque of 0.2 N·m max.

Y92E-F3R5 Mounting Bracket (for 3.5 dia.) (Order Separately)

The Y92E-F5R4 (for 5.4 dia.) is also sold separately.

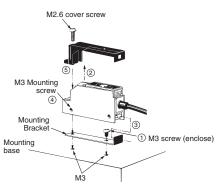

#### Mounting

#### **Mounting the Amplifier Unit**

#### E2C-JC4A

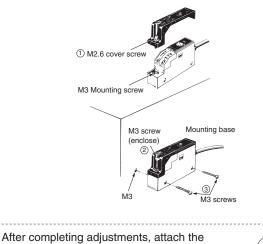

#### Lengthwise Mounting

- (1)Secure the Mounting Bracket with the enclosed M3 screws.
- (2)Loosen the M2.6 cover screw and remove the cover.
- (3)Slide the protrusion on the Amplifier Unit into the hole on the Mounting Bracket.
- (4)Using the M3 mounting screw inside the Amplifier Unit, secure the Amplifier Unit to the mounting base.
- (5)Secure the cover to the case.

#### Mounting to the Side

- (1)Loosen the M2.6 cover screw and remove the cover. Loosen the M2.6 cover screw and remove the cover, and remove the M3 screw.
- (2)Attached the enclosed M3 screw to the cover and secure the cover to the case.
- (3)Secure the Amplifier Unit with M3 screws from the side. You must provide these screws.

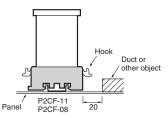

enclosed caution label over the adjustment holes to prevent adjustment mistakes.

#### E2C-A 4A Using P2CF-11

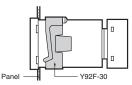

#### Using P2CF-11, P2CF-08

When aligning the Amplifier Unit vertically with the Socket, consider the space required for the hooks and allow a leeway of about 20 mm above and below the Amplifier Unit.

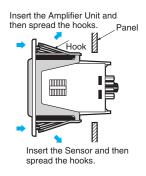

#### Mounting Embedded in a Panel

(1)When using the Y92F-30 Embedded Mounting Adapter, insert the Amplifier Unit into a square hold in the panel, attach the Adapter from the back and press in to reduce the gap with the panel. Then secure the Adapter with the screws.

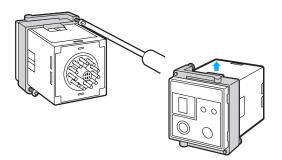

(2)When using the Y92F-70 or Y92F-71 Embedded Mounting Adapter, just press the Amplifier into a square hole in the panel. If the panel coating is too thick and the hooks do not lock in place, spread the hooks from the back by pushing in the directions of the arrows.

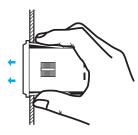

#### **Removing the Amplifier Unit**

• When the Amplifier Unit is mounted using the Y92F-30, loosen the screws on the adapter, spread the hooks at the top and bottom, and remove the Adapter.

• Using Y92F-70, Y92F-71

Press in on the hooks with your thumb and forefinger and press forward on the Amplifier Unit.

#### • Wiring

#### Self-diagnostic Output

When not using the self-diagnostic output, connect the orange wire to 0 V or cut it and wrap it with insulation tape so that it does not come into contact with other terminals.

#### Miscellaneous

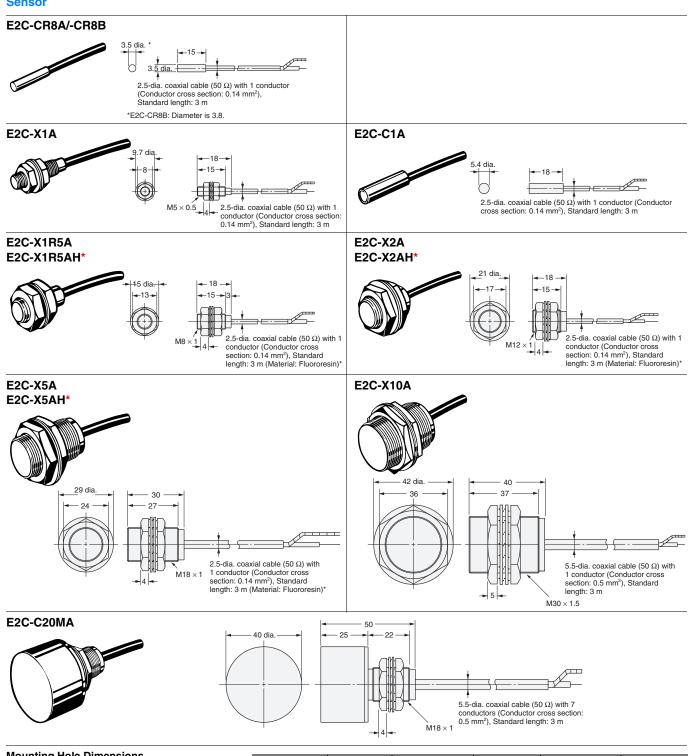

The sensor does not have a water-resistant structure. Do not use it where it would be subjected to water or water vapor.

#### **Dimensions**

(Unit: mm) Tolerance class IT16 applies to dimensions in this data sheet unless otherwise specified.

#### **Main Units**

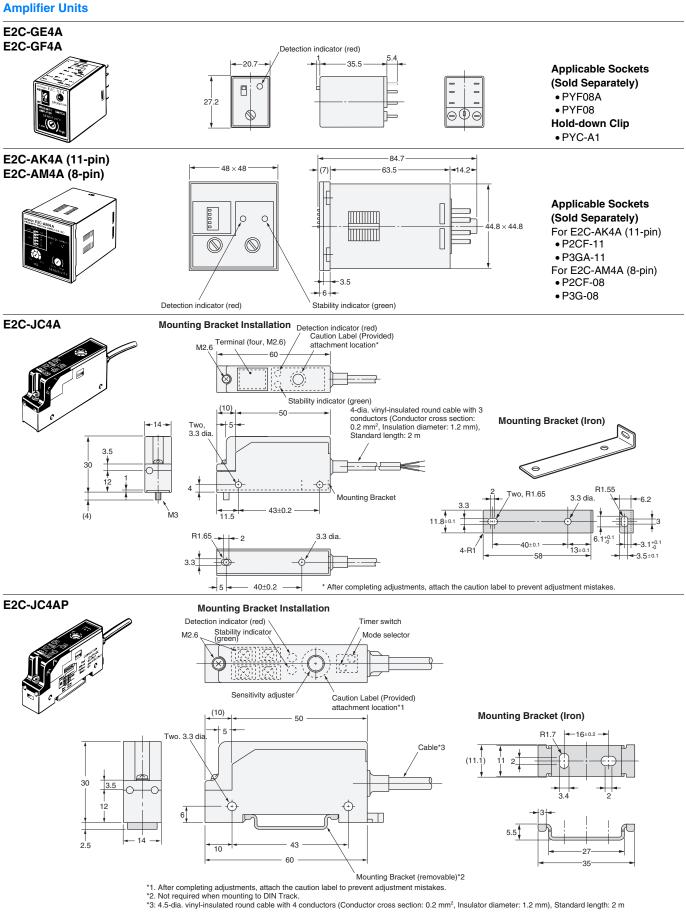

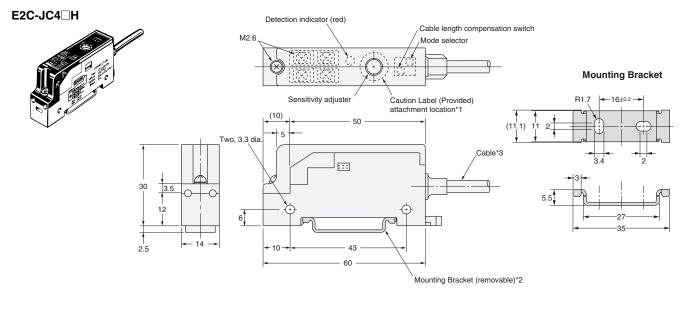

| Mounting | Hole | Dimensions |
|----------|------|------------|
|----------|------|------------|

|           | $\sum$ |
|-----------|--------|
| $\square$ | Л      |

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

#### Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

#### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

#### Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

#### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

#### Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions. Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

In the interest of product improvement, specifications are subject to change without notice.
