

HIGH POWER BARRACUDA MODELS:

The High Power Barracuda family offers digital control and full-regulation in a DOSA compliant footprint. These PMBus equipped DC-DC bus converters are designed to support 9.6V to 12Vdc intermediate bus applications where multiple low voltages are subsequently generated using point of load (POL) converters. The converters can also be used in other applications requiring a tightly regulated output voltage.

Footprint	Power Modules	Input Range	Vout	Iout	Efficiency	Detailed Specification

LOW POWER BARRACUDA MODELS:

The Low Power Barracuda family offers isolated DC-DC converters that are cost competitive and have optimum efficiency. These modules deliver up to 120W at a precisely regulated output voltage over a wide range input voltage from 36-75Vin.
