Note: For the L6 and A6 series, flush silhouette bezels are ordered separately to be combined with control units.

# Flush Silhouette LW series Control Units

Flush bezel projects only 2 mm from front of panel

Ø28 round and 28-mm square black plastic bezels. Round metallic bezels are also available.

- Ø25.3-mm round panel cut-out, 24.5-mm square panel cut-out.
- Collective mounting is possible.
- Separate type control units with a locking lever enable easy installation even when mounted collectively.
- Gold (gold-clad silver) or silver contacts.
- Degree of protection: IP65 (IEC 60529)
- UL recognized and CSA certified. EN compliant.

Safety Standards		File No. or Organization
UL		UL Recognition File No. E55996
CSA		166730 (LR21451)
EN	EN60947-1 EN60947-5-1	 TÜV Rheinland
		 EC Low Voltage Directive

## Specifications and Ratings

### Contact Ratings

#### • Gold Contact

Maximum Voltage	250V AC/DC		
Thermal Current	3A		
Operating Voltage	30V DC	125V AC	
Operating Current (resistive load)	0.1A	0.1A	
Contact Material	Gold-clad silver		

Minimum applicable load (reference value): 5V AC/DC, 1mA  
(Applicable range is subject to the operating condition and load.)

#### • Silver Contact

Operating Voltage		30V	125V	250V	
Operating Current	AC 50/60Hz	Resistive Load	–	3A 2A	
		Inductive Load	–	2A 1.5A	
	DC	Resistive Load	2A	0.4A	–
		Inductive Load	1A	0.2A	–
Thermal Current		5A			
Contact Material		Silver			

AC inductive load: PF = 0.6 to 0.7

DC inductive load: L/R = 7 msec max.

### Specifications

Operating Temperature	–25 to +60°C (no freezing) Illuminated units: –25 to +50°C	
Storage Temperature	–40 to +80°	
Operating Humidity	45 to 85% RH (no condensation)	
Contact Resistance	50 mΩ maximum (initial value)	
Insulation Resistance	100 MΩ minimum (500V DC megger)	
Dielectric Strength	Switch Unit	Between live part and ground: 2,500V AC, 1 minute Between terminals of different poles: 2,500V AC, 1 minute Between terminals of the same poles: 1,000V AC, 1 minute
	Illumination Unit	Between live part and ground: 2,500V AC, 1 minute
Vibration Resistance	Operating extremes: 5 to 55 Hz, amplitude 0.5 mm	
Shock Resistance	Damage limits: 1,000 m/s <sup>2</sup> Operating extremes: 100 m/s <sup>2</sup>	
Mechanical Life (minimum operations)	Momentary:	1,000,000
	Maintained:	500,000
Electrical Life (minimum operations)	Momentary:	100,000 (*1)
	Maintained:	100,000 (*2)
	*1 Switching frequency 1,800 operations/h *2 Switching frequency 900 operations/h	
Degree of Protection	IP65 (IEC 60529)	
Terminal Style	Solder/tab terminal no. 110 PC board terminal Screw terminal	

# Flush Silhouette LW Series Control Units

## LED Lamp Ratings (LSTD Type)

Type No.	LSTD-6②		LSTD-1②	LSTD-2②
Lamp Base	BA9S/13			
Rated Voltage	6V AC/DC		12V AC/DC	24V AC/DC
Voltage Range	6V AC/DC ±10%		12V AC/DC ±10%	24V AC/DC ±10%
Current Draw	AC	A, R, W, Y: 17 mA G, S: 8 mA	11 mA	11 mA
	DC	A, R, W, Y: 14 mA G, S: 5.5 mA	10 mA	10 mA
Color Code ②	A (amber), G (green), R (red), S (blue), W (white), Y (yellow)			
Lamp Base Color	Same as illumination color			
Voltage Marking	Die stamped on the base			
Life (reference value)	Approx. 50,000 hours (The luminance is reduced to 50% the initial intensity when used on complete DC.)			
Internal Circuit	A, R, W, Y			
	G, S			

## Mounting Hole Layout

### • Round Type

### • Square Type

Note: Mounting centers should be determined to ensure easy operation.

\* Screw terminal type: Vertical 40 mm, Horizontal 26 mm minimum

## Ordering Information

### Standard Units

- Specify a button or lens color code in the Type No.
- All illuminated units are supplied with an LED lamp.
- All standard units are UL recognized, CSA certified, and EN compliant (TÜV Rheinland).

	AC	DC					
6V AC/DC±10%	17 mA (A, R, W, Y) 8 mA (G, S)	14 mA (A, R, W, Y) 5.5 mA (G, S)	LSTD-6②	LSTD-6②	Specify a color code in place of ② in the Ordering Type No.	1	BA9S/13
				LSTD-6②PN10		10	
12V AC/DC±10%	11 mA	10 mA	LSTD-1②	LSTD-1②	A: amber G: green R: red S: blue W: white Y: yellow	1	
				LSTD-1②PN10		10	
24V AC/DC±10%	11 mA	10 mA	LSTD-2②	LSTD-2②		1	
				LSTD-2②PN10		10	

## Transformer

Separate Mounting Type	Primary Voltage	Secondary Voltage	Type No.	Applicable LED
For 6V 	100/110V AC	1W/5.5V AC	TWR516	LSTD-6②
	200/220V AC		TWR526	
	400/440V AC		TWR546	
For 24V 	100/110V AC	0.5W/24V AC	TWR512	LSTD-2②
	200/220V AC		TWR522	
	400/440V AC		TWR542	

- Terminal covers are included with separate mounting type transformers.
- Connect only one LSTD LED to separate mounting type transformers.

# Flush Silhouette LW Series Instructions

## Safety Precautions

- Turn off the power to the flush silhouette LW series control units before starting installation, removal, wiring, maintenance, and inspection of the products. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid burning your hand, use the lamp holder tool when replacing lamps.
- For wiring, use wires of a proper size to meet the voltage and current requirements. Solder correctly according to the instructions in "Wiring" and "Notes on Terminal Cover." Tighten the M3.5 terminal screws to a torque of 0.6 to 1.0 N-m. Failure to tighten terminal screws may cause overheating and fire.

## Instructions

### Panel Mounting

Remove the contact block from the operator. Insert the operator into the panel cut-out from the front, then install the contact block.

#### • Removing the Contact Block

Turn the locking lever on the contact block in the direction opposite to the arrow on the housing. Then the contact can be removed.

#### • Installing the Contact Block

Insert the contact block, with the TOP markings on the contact block and the operator placed in the same direction. Then lock the units, turning the locking lever in the direction of the arrow.

#### • Notes on Mounting

Use the optional ring wrench (LW9Z-T1) to mount the operator onto the panel. Tightening torque should not exceed 1.2 N-m. Do not use pliers. Excessive tightening will damage the locking ring.

#### • Collective Mounting

As the locking lever can be turned easily from the rear of the units using a screwdriver, the contact blocks can be removed even when mounted collectively.

### Replacement of the Lens and Marking Plate

#### • Removing

1. To remove the lens unit, press the sucker of the optional lens removal tool (MT-S01) onto the lens and pull the lens unit.

[Removing the Lens Unit]

2. Remove the marking plate by pushing the lens from the rear to disengage the latches between the lens and the lens holder, using the screwdriver as shown below.

[Removing the lens]

Note: The translucent filter in the lens holder cannot be removed because the filter is sealed to make the unit waterproof and oiltight.

#### • Installing

1. For round lens types, place the marking plate on the lens holder with the anti-rotation projection engaged and press the lens onto the lens holder to engage the latches. For square lens types, insert the marking plate into the lens, and press the lens onto the holder to engage the latches.
2. Make sure of correct orientation of the marking plate.

#### • Round Lens Type

#### • Square Lens Type

### Marking Plate and Films

For LW series illuminated pushbuttons and pilot lights, legends and symbols can be engraved on the marking plates, or printed film can be inserted under the lens for labelling purposes.

#### • Marking Plate and Marking Film Size

Lens	Round Lens	Square Lens
Built-in Marking Plate		
Applicable Marking Film		

• Engraving must be made on the engraving area within 0.5mm deep.  
• The marking plate is made of acrylic resin.

• Two 0.1mm-thick films or one 0.2mm-thick film can be installed in the lens.  
• Marking film is not included.  
• Recommended marking film: Polyester

#### • Insertion Order of Marking Plate and Film

##### • Round Lens Type

Note: Film is not included.

##### • Square Lens Type

Note: Film is not included.

Make sure of correct orientation of the marking plate.

# Flush Silhouette LW Series Instructions

## Instructions

### Replacement of Lamps

Lamps can be replaced using the lamp holder tool (OR-55) from the front of the panel, or by removing the contact block from the operator.

#### • How to Remove

To remove, slip the lamp holder tool onto the lamp head. Then push slightly, and turn the lamp holder tool counterclockwise.

Lamp Removal Tool  
OR-55

#### • How to Install

1. To install, insert the lamp head into the lamp holder tool, and hold the lamp as shown in the figure below.

2. Insert the pins on the lamp base into the grooves in the lamp socket. Insert the lamp and turn it clockwise.

### Wiring

1. Solder the terminals within 20W/5 sec or 260°C/3 sec without exerting external force to the terminals. While soldering, do not touch the soldering iron to the housing. While wiring, prevent tension from being applied to the terminals. Do not bend or raise the terminals, nor exert excessive force to terminals.
2. Use non-corrosive liquid flux.
3. Positive-lock connector and easy-lock connectors are applicable to tab terminals.
4. Tighten the terminal screw of the screw terminal type to a torque of 0.6 to 1.0 N·m.

### Notes on Terminal Cover

[Solder/Tab Terminal]

Insert the terminal cover into the contact block with the TOP markings on the contact block and the terminal cover in the same direction.

Note: When wiring, insert the lead wires into the terminal cover holes before soldering.

#### • Notes on Wiring

When installing a terminal cover onto the solder/tab terminal contact block, solder the inside of lamp terminal (toward the switch terminals) and wire.

[Screw Terminal]

Terminal cover must be installed on the control unit before wiring.

Note 1: After wiring, terminal covers cannot be installed.

Note 2: When terminal covers are installed, do not use round crimping terminals.

(Wire the terminals by using fork terminals or lead wires directly.)

### Single Board Mounting

Mounting the control units on a single PC board offers the following features.

1. Reduced installation labor, easy wiring, space saving, and standardization.
2. Since the contact blocks on the PC board can be removed easily using a locking lever, control units are easy to maintain.
3. Because the control units require no studs for fastening the control unit to a PC board, special preparation of operation panel is not needed.
4. For details on single board mounting, contact IDEC.

# Flush Silhouette L6/A6 Series Accessories

## New flush silhouette bezels for L6/A6 series ø16mm miniature control units

- Accessories for L6/A6 control units.
- Bezel Size
  - Round: ø24 mm (Panel Cut-out: ø20.2 mm)
  - Square: □24 mm (Panel Cut-out: □20.2 mm)
  - Rectangular: 24×30 mm (Panel Cut-out: 20.2×26.2 mm)

### • Applicable models

L6 Series	A6 Series
Illuminated Pushbutton	Illuminated Pushbutton
Pilot Light	Pilot Light
Pushbutton	Pushbutton
Selector Switch	Selector Switch
Key Selector Switch	Key Selector Switch
Illuminated Selector Switch	Illuminated Selector Switch
Lever Switch	
Buzzer	

Note: Flush silhouette bezels cannot be used for mushroom buttons or lenses.

## Flush Bezel

Shape		Material	Type	Package Quantity	Remarks
Flush Bezel	Round 	Metal (aluminium color)	LA9Z-SM61	1	• Degree of Protection: IP65 (only when used with IP65 control units)
	Round 	Plastic (black)	LA9Z-S61B	1	
	Square 	Plastic (black)	LA9Z-S71B	1	
	Rectangular 	Plastic (black)	LA9Z-S81B	1	
Switch Guard with Flush Bezel (Spring Return) Rectangular 	Plastic	LA9Z-KS8	1	• Used for L6/A6 rectangular pushbuttons and illuminated pushbuttons. Cannot be used for selector switches, illuminated selector switches, and lever switches. • Degree of Protection: IP65 (only when used with IP65 control units)	
Mounting Hole Plug	Round 	Plastic (black)	LA9Z-BS6	1	• Degree of protection: IP65
	Square 	Plastic (black)	LA9Z-BS7	1	
	Rectangular 	Plastic (black)	LA9Z-BS8	1	

Note: Terminal covers and maintenance parts for L6/A6 other than those shown above can also be used, except dust-proof covers.

# Flush Silhouette L6/A6 Series Accessories

## Ordering Information

- Control units are not supplied with flush bezels. Order flush bezels together with control units.

## Specifications

- Based on L6/A6 series control unit specifications.

## Dimensions

### • Flush Bezel

### [Flush Bezel with Control Units]

#### • L6 Series

#### • A6 Series

#### Selector Switch Illuminated Selector Switch

#### Key Selector Switch

#### Lever Switch

Unit	A (mm)
L6 selector switch	10.0
L6 illuminated selector	10.0
A6 selector switch	8.5

Unit	B (mm)
L6 key selector	18.1
A6 key selector	18.1

### [Mounting Hole Layout]

#### • Round

#### • Square

#### • Rectangular

Mounting hole layout for the L6 series is the same for both straight-lever contact type and L-lever contact type.

### • Flush Bezel with Switch Guard

#### [L6 Series]

#### [A6 Series]

### [Mounting Hole Layout]

Mounting holes are the same size as rectangular flush bezels.

### • Mounting Hole Plug

#### • Round

#### • Square

#### • Rectangular

Mounting holes are the same size as flush bezels.

All dimensions in mm.

## Safety Precautions

- Turn off the power to the control units before starting installation, removal, wiring, maintenance, and inspection of the products. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid burning your hand, use the lamp holder tool when replacing lamps.
- For wiring, use wires of a proper size to meet the voltage and current requirements and solder correctly. Improper soldering may cause overheating and fire. Also, when using tab terminals, use appropriate quick connect receptacles.

## Instructions

### Panel Mounting of Flush Bezels

#### • L6 series

1. Remove the contact block from the operator. Remove the locking ring and anti-rotation ring. To remove the operator from the contact block, turn the locking lever in the direction opposite to the arrow on the housing.
2. Attach the flush bezel to the operator. Then insert the assembly into the panel. Attach the mounting bracket and tighten the locking ring. (Do not use the anti-rotation ring supplied with the operator.)  
For round flush bezels, place the projection on the bezel to the groove on the TOP side of the operator and mount onto the panel.
3. Insert the contact block, with the TOP markings on the contact block and the operator placed in the same direction. Then lock the units, turning the locking lever in the direction of the arrow.

#### • A6 series

1. Remove the locking ring and anti-rotation ring from the operator.
2. Attach the flush bezel to the operator. Then insert the assembly into the panel. Attach the mounting bracket and tighten the locking ring. (Do not use the anti-rotation ring supplied with the operator.)  
For round flush bezels, place the projection on the bezel to the groove on the TOP side of the operator and mount onto the panel.

### Panel Mounting of Flush Bezels with Switch Guard

For installation, see Panel Mounting of Flush Bezels.

### Replacing the Lens

#### • Removing

Remove the operator (lens, marking plate, and lens holder) from the operator by holding the lens removal tool (MT-101) and pull out.

#### • Installing

Insert the operator in the correct direction.

• For other instructions, refer to L6 and A6 series catalogs.

## L6 Series ø16mm Miniature Control Units

### Requires only a light touch.

### Collective mounting possible.

- Separate type control units with locking lever enable easy installation even when mounted collectively.
- Bright and clear illumination face. LED illumination.
- Gold (gold-clad silver) or silver contacts; SPDT or DPDT
- Degree of protection: IP65
- UL recognized and CSA certified (except buzzers)  
EN compliant (except buzzers)  
(EN60947-1, EN60947-5-1, TÜV Rheinland)

### Contact Ratings

#### • Gold-clad Contact

Maximum Voltage	250V AC/DC	
Thermal Current	3A	
Operating Voltage	30V DC	125V AC
Operating Current	0.1A (resistive load)	0.1A (resistive load)
Contact Material	Gold-clad silver	

#### • Silver Contact

Operating Voltage		30V	125V	250V	
Operating Current	AC 50/60Hz	Resistive Load	–	3A	2A
		Inductive Load	–	2A	1.5A
	DC	Resistive Load	2A	0.4A	–
		Inductive Load	1A	0.2A	–
Thermal Current		5A			
Contact Material		Silver			

### Major Specifications

- Mechanical Life Momentary: 2,000,000 operations  
Maintained, lever switch, selector switch: 250,000
- Electrical Life 100,000 operations
- Degree of Protection IP65 (IEC 62529)
- Terminal Style Solder/tab terminal type no. 110  
PC board terminal

## A6 Series ø16mm Miniature Control Units

### Light Duty, Short Unibody Type.

- Bright and clear illumination face. LED illumination.
- Gold (gold-clad silver) contacts; SPDT or DPDT
- Degree of protection: IP65 or IP40
- UL recognized and CSA certified. EN compliant

### Contact Ratings

Maximum Voltage		250V				
Thermal Current		3A				
Operating Voltage		12V	24V	110V	220V
